

## Salinity Refractometer MASTER-S/MillIM

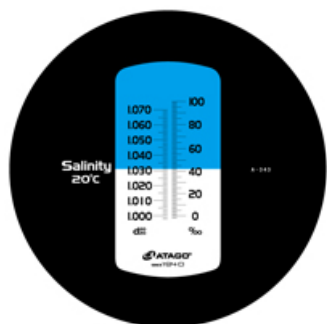

This instrument measures the salinity and specific gravity of seawater, and utilizes a new material that is durable against salty samples. The salinity of seawater is displayed in parts per mill (‰). The MASTER-S/MillIM is a good alternative choice when the water resistant feature is not a priority and the Temperature Compensation will be carried out manually. For the model with Automatic Temperature Compensation please choose [MASTER-S/Millα](#).

## Specifications

Model	MASTER-S/MillIM
Cat.No.	2493
Range	Salinity : 0 to 100‰ Specific gravity : 1.000 to 1.070
Minimum Scale	Salinity : 1‰ Specific gravity : 0.001

## Options

- Daylight plate : RE-2315-61M
- Daylight plate for small volume samplings : RE-2391-67M
