

## SLG-2000 Standard luminance generator

SLG-2000 is a standard source which can provide a large size area diffusely radiating source with uniform luminance. It has the advantages of good luminance uniformity, large luminance range, high stability, easy use, adjustable output current and etc. The instrument can provide a stable and uniform luminance source for quality inspection test of display to screen out quality products with higher accuracy.

Luminance range: 3000-20000cd/m<sup>2</sup> adjustable (continuous adjustable, special customizable)

Light source: LED light source, same CCT as illuminant C

Luminance stability:  $\pm 0.5\%$

Luminance uniformity: > 90%

Luminous region: more than 1500mm\*850mm
