

2XZ Rotary vacuum pump

2XZ Rotary vacuum pump series adopt the German Technology Vacuum pump are basic equipment used for pumping air from sealed vessels to attain vacuum condition. The pumps may be applied single, or as the forestage pump of other kinds of pumps, such as booster pump, diffusion pump, molecular pump and titanium pump.

The pumps also can be used in Making electrical Vacuum cases, Vacuum jointing, printing, plastics forming, fitting refrigeration equipment and laboratory.

Characteristics Description

1. Compact construction, light weight, low noise, high vacuum.
2. With Silencer device.
3. The mounting of the gas ballast valve allow the pump to pump certain amount of water vapor.
4. Easy to restart because of the mounting of a oil anti-suck back device.
5. Capture oil vapor in outlet to avoid environment pollution.
