

DSJ-5/DSJ-2 Electronic Hydrostatic Balance

DSJ-5: 5000g/0.1g

DSJ-2: 2000g/0.1g

Product description:

Electronic hydrostatic balance is an electronic balance specially designed for earthwork. It is novel and beautiful in appearance. It is equipped with a water tank, a tray support and a universal wheel. It is easy to operate.

With precision electronic balance of technical performance, superior cost performance, is the user's. Measurement of density and volume of solid samples. Combined with humanized design, novel structure and convenient operation, it is composed of electronic balance and hydrostatic equipment. The performance of precision electronic balance makes it have higher cost performance. The utility model improves the safety of weighing and meets the needs of different indoor and outdoor occasions.

Product features:

It has the functions of automatic calibration, peeling, zero tracking, unit conversion, piece rate, percentage and so on.

Alternating current direct current and output interface.

Spec:

Model	Weight	Small reading	Weighing method	Output interface	Net weight	Outline size	Outer packing size	Power Supply
DSJ-5	5000g	0.1g	Hereinafter referred to as law	RS232C	6.82kg	310 x 330 x 390mm	480 x 326 x 415mm	AC and DC dual purpose
DSJ-2	2000g	0.1g	Hereinafter referred to as law	RS232C	6.82kg	310 x 330 x 390mm	480 x 326 x 416mm	AC and DC dual purpose
